
All in one solar power system in New-Zealand

What is solar energy in New Zealand?

Learn about solar energy in New Zealand, and its advantages and limitations. In October 2022, Electricity Authority data showed 43,641 solar systems installed across New Zealand, adding up to 240 MW. This makes up an estimated contribution of under 1% of total electricity consumption.

Can a solar panel system be used in New Zealand?

A: Yes! New Zealand gets between 1,700 and 2,400 hours of sunlight per year -- more than enough for a solar panel system for home use. With rising electricity prices and government support for solar energy buyback, many homeowners see a full return on their investment within 7-9 years.

How do I choose the right solar installer in New Zealand?

Choosing the right solar installer in New Zealand is as crucial as selecting the right solar system. With various providers offering different packages, pricing structures, and levels of service, a direct comparison can help homeowners find the best value.

Why are New Zealand homeowners turning to solar power?

The way we power our homes is evolving. Across New Zealand, more homeowners are turning to solar - not just to save on electricity, but to take greater control in the face of rising energy costs, increasing demand on the grid, and growing concerns around power reliability.
