

Bucharest New Energy Storage Configuration Company

What is Romania's largest battery project?

Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date. The company will build a 400 MWh facility in Floresti, Cluj county, which is expected to be operational by the end of 2025.

How much storage capacity will Romania have in 2025?

This single project will double Romania's current installed storage capacity of 398.8 MWh, a figure that comes from transmission system operator Transelectrica, and mentioned by Romania's energy minister Sebastian Burduja in April, 2025.

How many energy storage systems will Nova have in 2028?

Nova also suggested that by 2028, the company plans to install energy storage systems of up to 600 MW / 1,200 MWh overall, supporting its gas power plants. Meanwhile, technology company Visual Fan announced this week that it has secured two separate contracts for a combined 182 MWh of battery energy storage system (BESS) projects.

How is Romania transforming the European energy landscape?

The investment wave, supported by key regulatory changes, is elevating Romania in the European energy landscape. Leading the development is Nova Power & Gas, part of the Romanian E-Infra Group, which has unveiled plans for the nation's largest battery project to date.

Nova Power & Gas's 400 MWh project in Cluj County is the largest battery energy storage system (BESS) to date to have been connected to Romania's grid.

The company continues to expand its investment portfolio, which includes the development of a new 200-MW gas-fired power plant and more than 600 MW / 1,200 MWh of ...

Nova also suggested that by 2028, the company plans to install energy storage systems of up to 600 MW / 1,200 MWh overall, ...

Before the new facility was commissioned, Romania's overall battery energy storage capacity was 398.8 MWh, according to data from ...

Nova Power & Gas is currently the largest player in battery storage capacity, with 240 MWh operational. The company continues its investment portfolio, which includes ...

Premier Energy strengthens its Romanian renewable electricity platform with the acquisition of a 400 MWh battery storage development capacity Bucharest, November 20th, ...

Nova Power & Gas, part of the E-INFRA group, has announced the commissioning of the largest battery energy storage facility in Romania, with a power of 200 MW and a storage capacity of ...

Nova also suggested that by 2028, the company plans to install energy storage systems of up to 600 MW / 1,200 MWh overall, supporting its gas power plants. Meanwhile, ...

Before the new facility was commissioned, Romania's overall battery energy storage capacity was 398.8 MWh, according to data from the country's transmission system operator, ...

Romania has commissioned its largest battery energy storage system (BESS) to date: a 200 MW / 400 MWh project in Cluj County, developed by private investor Nova Power & ...

Nova Power & Gas, a subsidiary of the E-INFRA Group, has officially commissioned Romania's largest battery energy storage system (BESS), a 200 MW facility with 400 MWh of ...

Nova Power & Gas is currently the national leader in battery storage capacity, with 240 MWh already operational. The company continues to expand its investment portfolio, ...
