# Can the solar panel glass still be used if it is completely broken

Can a broken glass panel still work?

A solar panel with a broken glass panel might still work, though with reduced output due to the "shade" from the broken glass edges. So, don't just throw the broken panel away -- at least check it for output first!

Can a broken solar panel still work?

Yes, a broken solar panel can still work. During the production process, precautions are taken to minimize the risk of mishaps in shipping and storage. However, it is inevitable that some panels may become broken during transit or while they are being installed.

What happens if a solar panel breaks glass?

If your solar panel has broken glass, two things can happen: Water or condensation can seep between the glass and the backing film. Water would disrupt the operation of the solar panel, and water is a bridge for electricity.

Can solar panel glass be replaced?

The glass on a solar panel can be replaced if it is cracked or broken. However, it is important to note that the replacement glass may not be as durable as the original glass. It is also important to have a qualified technician replace the glass on your solar panel to ensure that it is installed correctly. Is It Worth It Replacing the Glass?
