# Cost of 20kW Solar Containerized Container Used at Australian Airports

How much does a 20 kW solar system cost in Australia?

Many high-quality 20 kW systems in Australia in 2025 land around \$19,000-\$24,000, depending on component brands, installation complexity, and local incentives. Installed battery cost around \$1,200 per usable kWh. You should combine these two buckets to estimate your total project price: 20 kW PV only: ~\$19,000-\$24,000.

How much does a 20kW Solar System cost?

You can expect to pay around \$19,771 for a 20kW system installed. Prices can vary wildly depending on the quality of panels you install and the company that quotes the job. The above price is after you have received your government rebate (\$6,584 for 20kW systems) and does not include the price for battery backup.

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects--all while reducing carbon footprint and cutting energy costs.

Is a 20kW Solar System a good investment?

Financial Incentives such as STCs on a 20kW solar system is substantial as it contributes to offsetting carbon emissions on a larger scale than your average size solar system in Australia. An Outback Solar expert can advise you if a 20kW Solar System is the right system for you. How many panels does a 20kW Solar System consist of?
