
Generator with solar panels

Can solar power be used as a generator?

Technically, these units are electric power stations--giant battery packs, with the ports you need to plug in solar panels for charging. They can't actually harness solar power--and thus, act as a generator--unless you have both. They also require more than the panel to fully charge and need to be plugged in before use.

Which solar generator is right for You?

Whether you want something compact for camping or a larger unit for emergency home backup, these solar generators deliver the goods. The Jackery Solar Generator 2000 Plus is a fast-charging portable power station that can be bundled with SolarSaga 200W panels for recharging off-grid.

Can a solar power station be used as a generator?

However, using one effectively is a little more complicated than many people realize. Technically, these units are electric power stations--giant battery packs, with the ports you need to plug in solar panels for charging. They can't actually harness solar power--and thus, act as a generator--unless you have both.

How many solar panels can a generator power?

For example, our best large solar generator, the Jackery Solar Generator 2000 Plus, has a limit of 1,400 watts, which means it can handle up to six SolarSaga panels. The higher the limit, the faster you'll be able to charge from solar by adding more panels. How long can a solar generator power my device?
