## Generators for solar power stations

Can a solar power station be used as a generator?

However, using one effectively is a little more complicated than many people realize. Technically, these units are electric power stations--giant battery packs, with the ports you need to plug in solar panels for charging. They can't actually harness solar power--and thus, act as a generator--unless you have both.

How much does a portable solar generator cost?

A portable solar generator like the Dabbsson DBS1300 Portable Power Station - which still packs a punch with 1330Wh - was priced at \$599 at the time of this review. You can add on solar panels for an additional price.

What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.
