# Hospital Financing Using a 20-foot Folding Container

How many shipping containers does hospitainer surgical hospital have?

The standard Hospitainer Surgical Hospital consists of six 20ft shipping containers. The shipping containers are transformed into a medical facility with extreme robust characteristics. The standard configuration has an operation room (comprised of two 20ft containers), a pre- and post- OT room, sterilization unit, storage unit and staff unit.

How are shipping containers transformed into a medical facility?

The shipping containers are transformed into a medical facility with extreme robust characteristics. The standard configuration has an operation room (comprised of two 20ft containers), a pre- and post- OT room, sterilization unit, storage unit and staff unit. The units are connected through a bright central lobby.

Why should you buy a medical container?

Every container is equipped with insulated and easy to clean walls and medical floors. The equipment and configuration can be changed upon customer request. Additional modules, like X-ray , general treatment units and wards can be easily added into the structure due to the LEGO-like set up.

What is a surgical hospitainer?

The surgical Hospitainer is autonomous in water and energy management. The lobby floor, walls and roof are made of modular parts that are stored for transport in one of the containers. All medical rooms are equipped with robust and simple to maintain equipment. Every container is equipped with insulated and easy to clean walls and medical floors.

The Hospitainer Surgical Hospital is designed for general surgery and can be rapidly deployed as emergency hospital or, due to its low cost components, as semi-permanent field hospital.
