
Indonesia high power solar panels

Can solar power plants be used in Indonesia?

Indonesia possesses solar energy potential with a capacity ranging from 3,300 GW to 20,000 GW, spanning from Sabang to Merauke. With increasingly affordable, modular, and easy-to-build and operate solar power plant (PLTS) technology, this project could serve as a strategic solution to provide reliable and affordable energy access across Indonesia.

Could solar power revolutionize Indonesia's energy landscape?

The Indonesian government is set to implement a comprehensive solar energy plan that could revolutionize the country's energy landscape. With an immense capacity target of 100 GW, this initiative will focus on deploying solar panels throughout villages that often remain underserved in terms of electricity access.

Will Indonesia build a 100 GW solar power plant?

Jakarta, August 7, 2025 - Indonesia will build a 100 Gigawatt (GW) Solar Power Plant (PLTS). The program plans to build 80 GW of solar power plants and 320 GWh of Battery Energy Storage System (BESS) to be managed by the Merah Putih Village Cooperative (KDMP) in 80,000 villages, and 20 GW of Centralized solar power plants.

What is Indonesia's solar energy potential?

With a solar energy potential of 207 gigawatts (GW) across the archipelago, the establishment of this facility aligns closely with Indonesia's ambitious renewable energy goals.
