
Is there a hydrogen energy station in St John s

Is Irving Oil launching a hydrogen fuelling facility in Atlantic Canada?

Saint John (NB) - Irving Oil announced plans today to expand its hydrogen capacity at the Saint John refinery, with the goal of offering hydrogen fuelling infrastructure in Atlantic Canada, making the company the first to introduce hydrogen to the regional market.

Where can I find information on hydrogen refuelling stations?

LBST has operated the database h2stations.org since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide. Data is collected and updated continuously from multiple sources on a best effort basis.

How does a hydrogen fuel station work?

Check hydrogen fuel station availability before you arrive to avoid delays. Hydrogen fuel cells generate electricity through an electrochemical reaction between hydrogen and oxygen, producing only water vapor as a byproduct. This clean technology powers your vehicle with zero harmful emissions.

Which Canadian refinery produces the most hydrogen?

Today, the Irving Oil Saint John Refinery is the largest producer of hydrogen in Atlantic Canada and one of the largest producers in Canada - generating more than 200 tonnes of hydrogen per day, which is used to lower the sulphur content of petroleum products at the refinery.

Port is a key asset in Newfoundland and Labrador's first green hydrogen development St. John's, NL, June 1, 2023 - World Energy GH2 Inc. announced today that it ...
