
Luxembourg Government Energy Storage Planning Scheme

What is Luxembourg's Energy Policy?

Luxembourg's energy policy aims to respond to climate and environmental challenges and to guarantee the country's security of supply. Luxembourg complies with the climate ambition set by the international community through the Paris Agreement.

How can Luxembourg achieve zero emissions by 2050?

In order to achieve this objective, it is imperative to aim for and reach the zero emissions objectives by 2050 and the transition to 100% renewable energy. The Integrated National Energy and Climate Plan (NECP) (Plan national intégré en matière d'énergie et de climat) provides the basis for Luxembourg's climate and energy policy.

What are the 5 dimensions of Luxembourg's climate plan?

This plan has 5 dimensions in which Luxembourg can act: research, innovation and competitiveness. In order to achieve the objectives of the Paris Agreement, the national climate objective for Luxembourg is to reduce greenhouse gas emissions by 55% by 2030.

What will Luxembourg do in the future?

Citizens and scientists alike have come out in favour of even more ambitious targets and measures for Luxembourg in the future: the Platform for Climate Action and Energy Transition.

Six energy storage projects, totalling 3,626MWh of energy, have been successful in the Australian government's Capacity Investment Scheme (CIS) for Victoria and South Australia. As the ...

An Opportunity For Startups The roadmap, which is the result of a public consultation, aligns with Luxembourg's Integrated National Energy and Climate Plan, which ...

In order to achieve this objective, it is imperative to aim for and reach the zero emissions objectives by 2050 and the transition to 100% renewable energy. The Integrated ...
