
New energy power supply near Cyprus

How can I connect to the electricity supply in Cyprus?

Connecting to the electricity supply in Cyprus involves a visit to the nearest Electricity Authority customer service centre. The Electricity Authority of Cyprus (EAC) are the only power supply company on the island. The EAC website has information in English on domestic account details, metre reading, bill paying and more.

Are there private power plants in Cyprus?

As a precondition to the accession of Cyprus to the European Union, the local market for electricity generation has been opened to private companies, but so far no private power plants have been built, although four licences have been granted by Cyprus Energy Regulatory Authority.

What type of energy is used in Cyprus?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Cyprus: How much of the country's energy comes from nuclear power?
