
Outdoor Power Display Cabinet

What is a Longxing outdoor power cabinet?

LongXing outdoor power cabinet provides flexible size options, offers the ideal enclosure solution to build the whole base station inside.

What are outdoor LED displays?

The outdoor LED displays are designed to be extremely thin and light, ensuring high-quality visuals for various outdoor applications. They have a sleek profile, making installation and maintenance effortless. These displays are suitable for different outdoor environments, even in harsh weather conditions.

What sizes are available for outdoor LED displays?

1500MM*1000MM and 1500MM*500MM: The specific information regarding these sizes is not readily available; however, it can be inferred that these larger dimensions may be suitable for specific outdoor LED display setups that necessitate larger individual cabinet sizes to accommodate diverse display configurations and resolutions.

Why should you choose outdoor LED displays?

With an average power consumption of only 100-200 W per square meter, these displays not only lower energy costs but also have a reduced environmental impact while maintaining exceptional visual performance. The outdoor LED displays are designed to be extremely thin and light, ensuring high-quality visuals for various outdoor applications.
