
Philippines Cebu solar module export tariff

Is there a potential for solar energy in Cebu?

There is a huge potential for solar energy in Cebu, according to PV2 Energie Philippines, Inc.'s general manager Brenda Baylon during the Construction Show Cebu held last June 8, 2019, at the SM Seaside City Cebu Sky Hall.

What is the tariff rate in the Philippines?

The Philippines bound 67.6% of its tariff lines in the World Trade Organization (WTO), with a simple average final bound tariff rate of 24.9%. As a rule, imported manufactured goods competing with locally produced goods face higher tariffs than those without local competition.

Why is the US imposing a 19% tariff on Philippine exports?

The imposition of a 19% U.S. tariff on Philippine exports is a significant setback with the potential to disrupt trade flows and economic stability. However, it also presents an opportunity for the Philippines to strengthen its trade diplomacy, enhance product competitiveness, and diversify export markets.

Why do imported goods face higher tariffs in the Philippines?

As a rule, imported manufactured goods competing with locally produced goods face higher tariffs than those without local competition. The Philippines cites domestic and global economic developments to justify modifying applied duty rates for certain products to protect local producers.
