
Prices of solar greenhouses in Amsterdam

How big is the Netherlands commercial greenhouse market?

The Netherlands Commercial Greenhouse Market size is estimated at USD 2.66 billion in 2025, and is expected to reach USD 3.72 billion by 2030, at a CAGR of 6.90% during the forecast period (2025-2030). The integration of advanced technology in agriculture has enhanced farming practices and resource utilization efficiency.

Why is the Netherlands a good place to build a greenhouse?

The Netherlands has an impressive reputation: Dutch firms have many decades of knowledge and experience of designing and constructing top-quality, high-tech greenhouse facilities, and they are continually introducing new production methods and innovations.

How much do solar panels cost?

In addition, the specifications of the panels (such as power) and the cost of installation also play a role. On average, you pay around EUR500 to EUR600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. In general, the more panels you buy, the cheaper the price per panel becomes.

What crops are grown in a greenhouse in the Netherlands?

Horticulture crops maintain the largest market share in the Netherlands greenhouse sector, driven by strong demand for fresh vegetables, fruits, and flowers. The primary greenhouse-grown produce includes leafy greens, cucumber, tomatoes, peppers, herbs, squash, strawberries, peaches, coriander, chilies, and raspberries.
