

Riga Communication 5g base station large

What is 5G techritory in Riga?

The 5G Techritory event in Riga was developed eight years ago to highlight this expertise and invite big names from the telecoms industry to use Latvia as a national testbed and a playground for technological innovation. He adds the country already has shared its expertise and innovations with the likes of Ukraine and Moldova.

How does 5G work in Latvia?

On board Latvian port service provider LVR Flote's Varma icebreaker ship, the LMT has deployed 5G connectivity that can be delivered as far as 53km from the base station. Pilot boats and floating drones are all part of an intricate system to broadcast seabed measurements and remote video transmissions.

What will a 5G agreement mean for Riga Freeport?

The signed memorandum of understanding with the Riga Freeport fleet will allow innovative 5G technologies to promote digitalization of services provided in ports, modernization of technical equipment and fleet, provision of real-time communication between ships and with ports, development of autonomous solutions, their implementation and use.

Will 5G help Latvia's border security?

Latvia has recently accused Belarus of letting illegal migrants cross into Latvia. This is an instance where border security, police, and military need to collaborate. Not all of these units would have access to the traditional military "green radio." However, 5G has the potential to simplify coordination and collaboration at the country's borders.
