# San Diego Energy Storage Fire Solution

What happened at Gateway Energy Storage in San Diego?

The fire broke out on Wednesday at the 250MW Gateway Energy Storage facility owned by grid infrastructure developer LS Power in San Diego. A fire crew managed to get the blaze at the 16,000-square foot facility under control after around 24 hours, lifting evacuation orders that were made.

What happened at California's largest lithium-ion battery energy storage facility?

A fire at a California lithium-ion battery energy storage facility once described as the world's largest has burned for five days, prompting evacuation orders. The fire broke out on Wednesday at the 250MW Gateway Energy Storage facility owned by grid infrastructure developer LS Power in San Diego.

Does EPA have a settlement agreement with Gateway Energy Storage?

Connect with us on Facebook, Instagram, and X. U.S. Environmental Protection Agency (EPA) has entered into a settlement agreement with Gateway Energy Storage, LLC to direct cleanup in the wake of a lithium-ion battery fire that occurred at the company's energy storage facility in San Diego.

What is the largest battery energy storage project in the world?

The San Diego battery facility came online in 2020 and was billed at the time by grid infrastructure developer LS Power as the largest battery energy storage project in the world. Using LG Chem Lithium-ion cells, it beat the previous record held by a 150MW project in Australia, although has since been surpassed by other facilities.
