
Solar Panel 335WP

What are 335w polycrystalline solar panels?

With an efficiency rate of 16% to 17%, the panels are highly cost-effective. And hence, they are the first choice of most solar consumers. 335w Polycrystalline Solar panel are highly demanded panels in the market. Polycrystalline solar panels are also known as poly solar panel, multi-crystalline or many-crystal silicon panels.

What is a 335 watt solar panel?

A 335 Watt solar panel is a 96 cell solar panel that is similar to 60 cell solar panels due to the use of smaller solar cells. Our 335 Watt solar panels have eight solar cells going across and 12 solar cells going down, with dimensions of about 62.5" x 41.5" x 1.6".

How much do 335w solar panels cost?

335W panels off-the-shelf cost around ₹150 to ₹200 depending on quality but bigger capacity panels are around ₹180 to ₹280. On average you will need around 10 solar PV panels on a roof to power the average house, or eight bigger capacity panels. So you're looking at at least a couple of thousand for the panels themselves.

What is the difference between 410wp & 335wp solar panels?

The 410Wp Marley SolarTile™ photovoltaic roof panel provides a higher peak power output than the 335Wp panel, delivering up to 410Wp per tile. This increased capacity allows homeowners to generate more electricity from the same roof area or install fewer tiles to achieve the desired system output.

The MEGA 335 offers high power and efficiency with a 335W 24V output. Built for efficiency and durability to handle any large-scale solar needs..
