
Solar module project starts construction

The construction of this project will promote the development of Kunshan City and even the entire photovoltaic industry.

Construction started on the photovoltaic module auxiliary materials supporting project of JA Solar in the Yiwu Economic Development Zone on June 7.

With a solar module facility in the U.S. and solar cell manufacturing facility in Batang already in operation, SEG adds that the ingot and wafer factory also establishes an end-to-end ...

Among them, the first batch of 3.3GW photovoltaic projects located in the Jinsha River upstream clean energy base officially started ...

On the afternoon of May 6, 2024, the 100MW fishery-solar complementary photovoltaic power generation comprehensive utilization ...

The project is the first "photovoltaic + energy storage" project in Kazakhstan, the largest single installed capacity photovoltaic storage project in the country, and the first new energy project ...

The project will be completed in two phases with a total investment of 5 billion yuan to produce 3GW of perovskite solar cells and ...

As the first photovoltaic project to use large offshore steel truss platform fixed pile foundations in China, the project will also achieve integrated development and utilization of ...

The Zhala Mountain Photovoltaic Power Station of the SDIC Yalong Hydro began construction on August 25th, 2023. It is another landmark project of the Yalong Riverhydro, ...

PowerChina Launches Massive 31 GW Solar Module Tender for 2026 Projects China Power Construction Corporation's PowerChina solar tender China Power Construction ...

Recently, construction has commenced on several photovoltaic projects, reaching a total capacity of 2GW and with a total investment of nearly 6 billion yuan. On August 19th,

BEIJING, Nov. 13 (Xinhua) -- China's first gigawatt-level open-sea offshore photovoltaic (PV) project, developed by state-owned energy firm CHN Energy, successfully connected its first ...

Recently, Majiatan Town in Lingwu City, Ningxia, has made an important progress in the field of energy construction - the 2000MW photovoltaic composite power station (Phase II 1000MW) ...

The construction of China's largest offshore solar project to date officially began in Lianyungang City, east China's Jiangsu Province, on Sunday. The 2-million-kilowatt ...

The project will adopt next-generation photovoltaic modules, solar tracking systems, and energy storage solutions, representing the advanced technological level of ...

"The launch of construction for the Sainte-Anne power plant marks a significant milestone for Voltalia and for the energy transition in French Guiana. This innovative project, ...
