
Solar powered surveillance trailer

What is a solar surveillance trailer?

A solar surveillance trailer is a fully mobile security unit that delivers rapid, flexible protection without the need for permanent power or internet. They are designed for temporary security needs or remote deployments where traditional cameras aren't practical. Key components of solar surveillance trailers include:

What is a mobile surveillance trailer?

Mobile surveillance trailers have become a vital part of modern security strategies for construction sites, parking lots, and outdoor events. These surveillance trailers are equipped with high-resolution surveillance cameras, often including PTZ cameras, to offer flexible, wide-angle views.

What is a chariot solar surveillance trailer?

The "Chariot" solar surveillance trailer is a security camera trailer that can be driven to any location with or without power infrastructure and can immediately begin streaming live video to your phone, adding Wi-Fi connectivity to your property, two-way communication, and several other configurable features.

How does the VORP energy surveillance trailer work?

The Vorp Energy Surveillance Trailer is autonomously powered with batteries and a monocrystalline solar array designed to capture the maximum amount of sunlight/energy. It can be fitted with up to a 1600W solar array, which is the largest solar panel array available on a mobile platform.
