How many kilowatts of solar inverter can a home install?

The Good: In these locations, properties can usually install up to 10 kilowatts of solar inverter capacity if they have single-phase power and up to 30 kilowatts with 3 phase power. Residential properties are unlikely to be allowed to use export limiting to install even larger inverters.

Will a 5 kilowatt solar inverter go to waste?

So if an inverter that is export limited to 5 kilowatts is providing 8 kilowatts of power, none of it will go to waste provided the home is consuming at least 3 kilowatts at the time. But there will often be times when the solar system will produce more power than can be exported, so some energy will be lost 3.
