
Sucre Green Energy Branch Site

What is Sucre (sugarcane renewable electricity)?

LNBR led SUCRE (Sugarcane Renewable Electricity), a five-year project funded by the Global Environment Facility through the United Nations Development Programme to increase the supply of low-GHG electricity through the generation of bioelectricity from straw. SUCRE is a legacy from 2015 to 2020.

How can sugar industries contribute to greener energy?

Sugar industries have enormous potential to contribute to the sustainable transition to greener energy, either via the generation of electricity or the production of biofuels.

Are liquid biofuels a viable energy source for the sugar sector?

However, liquid biofuels form only part of the energy potential of the sugar sector today. Apart from these liquid biofuels, the sugar sector also has great potential to generate energy from residues and waste products that are available from within the sugar production process.

Is bagasse-based electricity a major activity for sugar cane mills?

Bagasse-based production of electricity for export to the national grid is now well-established and has become a major activity for sugar cane mills in a growing number of countries. The study examines Brazil, Guatemala, Honduras, India, Mauritius, and Nicaragua to better understand their development of bagasse-based electricity generation.

SUCRE A cana-de-açúcar é uma das mais importantes/mais promissoras culturas energéticas devido a sua alta energia primária por área cultivada (aproximadamente 600 GJ/ha), mas a ...

SUCRE A cana-de-açúcar é uma das mais importantes/mais promissoras culturas energéticas devido a sua alta energia primária por área cultivada ...

Sucre Energy, a Netherlands-based and Spanish-registered private equity company, acquired the central Venezuelan assets of Japan's Inpex in a deal that closed in May for an undisclosed sum.

10 MW Unit Facturacion Energia - Hidrogeno ... The projected energy and hydrogen billing over 6 years, taking the price of \$190/KW- and \$4/Kg respectively, shows that ...

Chongqing - As the global push toward carbon neutrality intensifies, Southeast Asian experts seek to deepen partnerships with ...

France's TotalEnergies is in talks to sell its majority stake in the YPergas joint venture (JV) in Venezuela to private equity group Sucre Energy, reported ...

Green building is the practice of increasing the efficiency with which buildings use resources energy, water, and materials while reducing building impacts on human health and the ...

LNBR led SUCRE (Sugarcane Renewable Electricity), a five-year project funded by the Global Environment Facility through the United Nations ...

If you're exploring large-scale energy storage solutions or renewable energy project planning, this deep dive into the Sucre Large Energy Storage Power Plant offers ...

Another green energy avenue that is increasingly being explored, as a diversification option, is the production of biogas and biomethane. These can be produced ...

The objective of the project is to create the conditions for sugar mills to increase the export of electricity generated by sugar cane trash and bagasse to the grid. This will be ...

Branches information, phone numbers, addresses and contact points for Salé Sucré

LNBR led SUCRE (Sugarcane Renewable Electricity), a five-year project funded by the Global Environment Facility through the United Nations Development Programme to increase the ...

LNBR is part of the Brazilian Center for Research in Energy and Materials (CNPEM) - a private, non-profit, research and development institution under supervision of the Brazilian Ministry of ...
