# Total installed capacity of battery energy storage reaches 1511MW

How big is China's energy storage capacity?

The most notable finding: by the end of 2024, China had reached 73.76 GW/168 GWh in cumulative new energy storage capacity--an increase of more than 130% year-on-year. This figure accounts for over 40% of the global total, consolidating China's leading position in the international NES market.

How much energy storage does China have in 2023?

By the end of 2023, China had completed and put into operation a cumulative installed capacity of new type energy storage projects reaching 31.4GW/66.9GWh, with an average storage duration of 2.1 hours. The newly added installed capacity in 2023 was approximately 22.6GW /48.7GWh, which is three times that for 2022 (7.3GW /15.9GWh).

How much battery storage does Germany have?

Residential storage accounted for 88% of new installations in both Q3 and year-to-date figures (by energy capacity). By September 2024, Germany's cumulative battery storage installations totaled 10.3 GW/15.9 GWh, with residential systems making up 85% of the total.

How much energy storage capacity does China have in Q3?

In Q3 alone, newly installed capacity amounted to 6.79 GW/16.89 GWh, showing year-on-year increases of 62% and 99%, but quarter-on-quarter declines of 29% and 26%, respectively. Fig 2: Cumulative Installed Capacity of Operational Non-hydro Energy Storage Projects in China (as of Sep 2024)

Cumulative installed storage capacity, 2017-2023 - Chart and data by the International Energy Agency.

China's installed energy storage capacity climbed to 164.3 GW by June 2025, according to the China Energy Storage Alliance (CNESA), marking a 59% increase compared ...

China's electrochemical energy storage industry saw explosive growth in 2024, with total installed capacity more than doubling year-on-year, according to a report released by the ...

The Data Briefing shows that the growth rate of electrochemical energy storage slowed down in the first quarter. The enterprise member units of the National Electric Power ...

The Coverage and Intensity of Policies Continuing to Increase Technological breakthrough and industrial application of new type storage are included in the 2023 energy ...

In BloombergNEF's 2H 2023 Energy Storage Market Outlook report, the firm forecasts that global cumulative capacity will reach ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing ...

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

China's installed energy storage capacity climbed to 164.3 GW by June 2025, according to the China Energy Storage Alliance ...

---

Global pumped storage capacity 2024, by leading country Energy Battery storage cumulative capacity in Europe 2022-2030 Batteries Lithium-ion battery price worldwide 2013 ...

More than 80% of the newly installed energy storage capacity in H1 2025 was reported from North China, Northwest China, and South China, accounting for 29.7%, 25.7%, ...

The installed capacity of renewable energy has achieved fresh breakthroughs. In the first half of 2024, the nationwide newly installed capacity for renewable energy power ...

Technology-wise, lithium-ion batteries remained dominant, comprising 96.4% of total installed capacity. However, the report notes ...

There is now 150GW/348GWh of globally installed capacity, according to the database, which focuses on grid-scale battery energy ...

China market: Pumped Hydro Storage share falls below 50% for the first time. Non-hydro Storage accumulative installations surpass 50GW for the first time. According to ...

The global energy storage market had installed 175.4 GWh of capacity by 2024, with Tesla leading shipments. Europe accounted for ...
