What is Ukraine's energy roadmap?

A roadmap for Ukraine's increased use of distributed energy resources towards 2030 This roadmap from the IEA, Empowering Ukraine through a Decentralised Energy System, outlines a pathway to rebuild and modernise Ukraine's power sector amid ongoing attacks on its energy infrastructure.

Does Ukraine need a long-term energy system?

More than ever, Ukraine needs support to transition towards a long-term energy system that is resilient, flexible and secure. The EU has the expertise, the ability and the will to help make that happen. Ukraine's energy systems have suffered significant damage since the full-scale invasion of 2022.

Can a decentralised electricity system empower Ukraine?

Hence, in context of the report Empowering Ukraine Through a Decentralised Electricity System, a pioneering, detailed and bottom-up approach was developed to create a new high-resolution dataset of capacity and generation potential for Ukraine.

What happened to Ukraine's energy infrastructure?

Link Copied! Several regions of Ukraine have endured a night of Russian drone and missile attack targeting energy infrastructure that left more than a million households without power, according to the interior ministry.
