What are the benefits of solar power in Wellington?

One significant advantage of solar power in Wellington is when solar panels produce more electricity than needed, the excess energy can be fed back into the grid. This process allows consumers to earn credits, reducing their overall energy bills and contributing to the city's sustainable energy goals.

How does solar energy work in Wellington?

Wellington's sunlight ensures that solar panels can consistently produce a substantial amount of clean energy. The electricity produced by solar panels is in the form of DC current, while most homes and businesses in Wellington use alternating current (AC). To make the solar energy usable, solar inverters are employed to convert DC into AC.
