# Wholesale 20-foot solar-powered containers for airport use

What is a mobile solar container system?

The mobile solar container system includes solar panels, storage batteries, inverter, mounting brackets, and accessories. Solar panels collect energy from the sun and store it in the battery bank, and the inverter converts it to AC power for use.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

How mobile solar containers can be transported?

The solar panels' rail system and folding mechanism are fixed on a sturdy floor frame. This configuration makes it simple to transfer the mobile solar containers by trucks, trains, and cargo ships.

Foldable, mobile, compact, and modularized. Mobile solar containers can be compactly stored and easily transported to different locations.

How does a Meox 20ft mobile solar container work?

Meox 20ft mobile solar container stores foldable solar panels, providing a convenient way to generate green electricity on the go. When needed, the container is transported to its destination, and the foldable panels are easily unfolded using a rail system that slides them out from the container.

Power up your off-grid lifestyle with a mobile solar container. Find out how the Meox 20ft container with foldable solar panels can provide a reliable source of electricity in rural or remote areas.
